Maintenance

The Programme below will form part of the maintenance regime for this place. The programme will be the responsibility of the Owner or the Owner’s nominee. Should the property be sold the new proprietor shall nominate the person responsible for carrying out this maintenance schedule. The Heritage Council of Western Australia should be notified of any change of the person responsible.

This schedule is concerned with the significant heritage fabric and the presentation of the place. It does not aim to cover all the statutory requirements concerning plant and machinery. The required inspection of these items should form part of a broader more comprehensive schedule prepared by the proprietor or building manager.

This schedule should be regarded as provisional and should be adapted by mutual agreement to suit circumstance and experience. This schedule should be regarded as a minimum standard. The schedule should be adhered to in any period where the place is wholly or partially unoccupied.

It is not envisaged that structural monitoring of the building will be required. However, assessment and monitoring of internal and external wall and ceiling mounted and fixed machinery and plant will need to be undertaken regularly.

Should the place be subject to damage by fire, infestation, seismic or building activity or alteration of the foundation, an inspection of the building frame and affixed machinery by a qualified structural engineer will be required and any recommendations implemented.

Periodic Maintenance Schedule

Interpretation Works

Interpretation is described generally in the Midland Railway Workshops Interpretation Concepts Plan (Stephen Carrick Architects, August 2012) and more specifically in the Heritage Strategy (Heritage and Conservation Professionals, 2004), Midland Railway Workshop, Main Store, Conservation Plan (Hocking Heritage Studio, February 2014) and Oil Store, Midland, Conservation Management Plan (Philip Griffiths Architects, 2014).

Interpretation outcomes and objectives need to meet with the approval of the Council in consultation with the Metropolitan Redevelopment Authority (MRA) and designed, fabricated and installed to the satisfaction of the Council.

Interpretation outcomes and objectives should be determined as new development and adaptive reuse are being planned for within the building, so that they contribute to informing design outcomes and are integrated into the staging of the new development. Proposals will align with the ‘Interpretation Principles’ and relate to the endorsed central theme and sub-themes for the Workshops as set out in the Interpretation Concepts Plan. Designs will be based on the selection presented in the “Design Concepts” included in the Interpretation Concepts Plan.

In addition to the interpretation required for extant fabric, machinery, associated equipment and fixtures as outlined below, a minimum of two additional interpretive proposals are to be included in any new development that are derived from the suite of options provided in the “Design Concepts” included in the Interpretation Concepts Plan. Variations or alternatives to these established concepts will be considered by mutual agreement as long as they still meet the Interpretation Principles, and relate to the endorsed themes, function and stories of the building.

Machinery, equipment and associated items that contribute to the cultural heritage significance of the Place and are to be retained are identified in the attached Table and Plan Midland Railway Workshops: Main Store Machinery and Equipment to be Retained (March 2015).
