1. DATA BASE No. **23664**
2. **NAME** *A.T. Brine's Donnybrook Sandstone Quarries (fmr) (c.1904)*
FORMER NAME (or OTHER NAMES) Quarry No.3
3. **LOCATION** Lot 3124 Grist Road, Donnybrook
4. **DESCRIPTION OF PLACE INCLUDED IN THIS ENTRY**
Portion of Lot 3124 on Deposited Plan 254012 being part of the land contained in Certificate of Title Volume 1051 Folio 320 as to the portions labelled "M" on Interest Only Deposited Plan 404045.
5. **LOCAL GOVERNMENT AREA** Shire of Donnybrook-Balingup
6. **OWNER AT INTERIM REGISTRATION**
6ITBED Pty Ltd
7. **HERITAGE LISTINGS**
 - Register of Heritage Places: Interim Entry 3/10/14
Permanent Entry 27/2/2015
 - National Trust Classification: -----
 - Town Planning Scheme: -----
 - Municipal Inventory: [Irishtown Sandstone Quarry] 27/11/2013
 - Register of the National Estate: -----
8. **ORDERS UNDER SECTION 38 OR 59 OF THE ACT**

9. **HERITAGE AGREEMENT**

10. **STATEMENT OF SIGNIFICANCE**

A.T. Brine's Donnybrook Sandstone Quarries (fmr), a linear arrangement of four sandstone quarries running north-south within a band of native vegetation, and associated archaeological sites including abandoned quarrying equipment, has cultural heritage significance for the following reasons:

the place was an important source of Donnybrook Sandstone, a distinctive, high quality building material that became popular in Western Australia during the early twentieth century. It was Perth's premier building material at the time and was used in a number of high profile public buildings, making a significant contribution to the character of Perth;

the vast array of historical quarry workings, and the abandoned equipment remaining at *A.T. Brine's Donnybrook Sandstone Quarries (fmr)*, is a rare and intact example of an important historical industrial process that is not found at any of the other sandstone quarries in the Donnybrook area;

the place is an excellent representative example of the quarrying techniques used to extract Donnybrook Sandstone during the early twentieth century;

the place has a high degree of potential to provide information about the process of quarrying sandstone in the early twentieth century, through remnant stone formations and remnant infrastructure that remains in-situ;

the place is associated with prominent Western Australian builders A.T. Brine and Son and S.B. Alexander, who were responsible for a number of high profile construction projects that helped shape the character of Perth in the early twentieth century; and,

the place provided Donnybrook Sandstone to a number of prominent Perth building projects and its distinctive character has created places of great social value to the Western Australian community, and helped to define the city's sense of place.
