 - Municipal Inventory: -----
 - Register of the National Estate: -----
8. **CONSERVATION ORDER**

9. **HERITAGE AGREEMENT**

10. **STATEMENT OF SIGNIFICANCE**
House, 66 Stirling Highway, a split level residence constructed with tuck pointed brick and covered in rough cast render and rendered limestone with a replacement custom orb zinc roof, has cultural heritage significance for the following reasons:

the place is an unusual split level worker's cottage;

by virtue of its relationship to the lot boundaries, its scale, geometry and modest presentation, and notwithstanding its compromised state, the place contributes to the general and consistent character of this area of North Fremantle, which has a mix of built forms, including workers' cottages, Pensioner cottages, public buildings and light industrial buildings; and,

the place is part of the suburban residential development that came about with the expansion of Fremantle and South Fremantle following

the discovery of gold in Western Australia in the 1880s and 1890s and the increase in population and public monies due to the goldrushes.

The current render treatments, enclosure of the front verandah and gardens are considered to have low significance. The infill structures under the rear verandah and the enclosure of the rear verandah have little significance.
